

Sandoban

Rates quoted in HerbiGuide were for Sandoban formulated herbicide, which is no longer marketed in Australia.

A similar mix equivalent to 1000 mL of Sandoban may be prepared by mixing 300 mL of dicamba amine 200 with 333 mL of glyphosate CT 450.

See individual components, dicamba and glyphosate for general information.

Tradename	Manufacturer
Formerly Sandoban	Novartis

Active constituents - 150g/L dicamba + 150g/L glyphosate
