1 O Ways HerbiGuide Helps You.

- **1. Save time.** No more searching through heaps of papers or internet links to find answers.
- 2. Save money. Money saving mixtures for multiple weeds and cut-rates for good conditions.
- **3. Always available.** No more waiting for the office to open or your expert to return.
- **4. Use up old stock.** Multiple solutions allow you to choose products on hand.
- **5.** Up to date. Cheap annual updates have new products, prices and solutions.

6. Record your brews and prices

They will appear with the HerbiGuide solutions.

- 7. Identify unknown weeds and find the controls before they take off.
- **8. Improve your understanding** of weeds, pests and products that control them.
- **9. Toxic and environmental data** makes selection of desirable products easier.
- **10. Photographs**, descriptions and diagrams ensure you spray the right weed, insect or disease.

HerbiGuide The Pesticide Expert on a Disk

Will you discover herbicide resistance, incompatibility, crop damage or the conditions causing poor pesticide performance by costly

"HerbiGuide presents complex and detailed information quickly... installation is simple." - FARM Magazine. experience? If you don't use the right products at the right rate at the right time then you are losing money. Too

little results in poor control and loss of yield. Too much is wasteful and increases the risk of crop damage and environmental contamination.

Every year new herbicides, insecticides, fungicides and seed dressings are marketed, new planting techniques are promoted and new weed and pest problems develop. How do you put it all together and provide the crop protection you need with minimum impact on the environment and yourself?

Identify weeds quickly. With over 2000 colour photos.

Information is the key -Information that takes into account your particular situation, interprets your data and gives you the alternatives for better decisions. HerbiGuide, the award winning computer program can provide all the information you need about weeds, insects, diseases and the methods of controlling them.

With HerbiGuide it's as simple as 1-2-3. Select the crop, select the weeds, insects and diseases then click the mouse for solutions and mixtures.

Before HerbiGuide was developed the information from labels, experiments and farmers observations were not easily accessible. Even the most diligent farmers and advisers had difficulty keeping up with the latest developments. Now you can use the speed and power of your personal computer to retrieve this information. HerbiGuide is the *Crop Protection Expert on a Disk*. You can use this expert - whenever you need it, 24 hours a day, 7 days-a-week before you spray each paddock. Use it to fine tune your application program and avoid problems rather than discovering them when it's too late.

"... a single key press will tell you the difference between wild radish and wild turnip..."

- Wagin Woolarama Review.
