

Atrazine plus Simazine

Tradename : Formerly Simat and Gesatop A.

The commercial mixtures are no longer marketed.

Rates quoted in HerbiGuide were for the pre mixed products.

1000 mL of the mixture is equivalent to 500 mL of Flowable Atrazine 500 plus 500 mL of Flowable Simazine 500.

Similarly 1000 mL of the mixture is equivalent to 278 grams of Atrazine 900 granules plus 278 grams of Simazine 900 granules.

This mixture is quite useful where the crop tolerance or soil type make the safety of atrazine marginal.

See individual components, atrazine and simazine, for other information.
