

STORAGE AND DISPOSAL

The method of disposal of the container depends on the container type. Read the Storage and Disposal instructions on the label that is attached to the container.

Store in the closed, original container in a cool, well-ventilated area. **DO NOT** store for prolonged periods in direct sunlight.

All non-refillable containers (unless otherwise specified)

Triple rinse containers before disposal. Add rinsings to spray tank. **DO NOT** dispose of undiluted chemical on-site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and deliver empty packaging for appropriate disposal to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations. Empty containers and product should **not** be burnt. **DO NOT** re-use empty container for any other purpose.

Envirodrum - Micro Matic Valve (110L)

Store the original sealed Envirodrum in a cool, well ventilated area. **DO NOT** store for prolonged periods in direct sunlight. **DO NOT** tamper with the Micro Matic valve or the security seal. **DO NOT** contaminate the Envirodrum with water or any other foreign matter. After each use of the product please ensure that the Micro Matic coupler, delivery system and hoses are disconnected, triple rinsed with clean water and drained accordingly. When the contents of the Envirodrum have been used, please return the empty Envirodrum to the point of purchase.

SAFETY DIRECTIONS

Poisonous if swallowed. Avoid inhaling vapour or spray mist. Will damage eyes and skin. Avoid contact with eyes and skin. When opening container and preparing spray and using the prepare spray wear cotton overalls buttoned to the neck and wrist and washable hat, elbow-length PVC gloves and face shield or goggles. If clothing becomes contaminated with product remove clothing immediately. If product on skin, immediately wash area with soap and water. If product in eyes, wash it out immediately with water. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each day's use, wash gloves, face shield or goggles and contaminated clothing.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. (Phone Australia 13 11 26). If swallowed **DO NOT** induce vomiting. Give a glass of water. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. Remove from contaminated area. Apply artificial respiration if not breathing. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

DIRECTIONS FOR USE**RESTRAINT:****DO NOT APPLY IF RAIN IS EXPECTED WITHIN 6 HOURS**

Crop	Pest	Rate	WHP	Critical Comments
Macadamia (Qld, NSW, ACT, WA only)	Macadamia Nut Borer Suppression	Dilute spraying 50 mL/100L Concentrate spraying Refer to the Application section	7 days	Apply by dilute or concentrate spraying equipment. Spray to thoroughly cover nuts when pest numbers indicate, or at 2 to 3 weekly intervals during the period when pests are normally active. Use the shorter interval and the higher rate during wet weather or severe infestations. Avoid season-long application of the same insecticide. Good pest management involves the use of alternative chemical groups to avoid resistance build-up.
	Fruitspotting Bug Suppression	Dilute spraying 25 or 50 mL/ 100L Concentrate spraying Refer to the Application section		Apply the same total amount of product to the target crop whether applying this product by dilute or concentrate spraying methods. Can be used up to 5X concentrate. DO NOT use at concentrate rates greater than 250 mL/100L of water (i.e. 5X concentrate)

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.**WITHHOLDING PERIODS (WHP):****MACADAMIAS: DO NOT HARVEST FOR 7 DAYS AFTER APPLICATION.****Export of treated produce**

Growers should note that suitable MRLs or import tolerances may not be established in all markets for produce treated with Imtrade Cyborg™ 25 EC Insecticide. If you are growing for export, please check with Imtrade Australia Pty Ltd for the latest information on MRLs and import tolerances before using Imtrade Cyborg™ 25 EC Insecticide.

GENERAL INSTRUCTIONS

MIXING

Add the required quantity of Imtrade Cyborg™ 25 EC Insecticide to water in the spray tank and mix thoroughly.

APPLICATION

Imtrade Cyborg™ 25 EC Insecticide can be applied by air or ground equipment. In common with other non-systemic insecticides adequate coverage with Imtrade Cyborg™ 25 EC Insecticide is essential for maximum effectiveness.

When applying by air use a minimum of 20L of spray mixture per hectare. Spray in crosswinds. **DO NOT** spray in calms or when wind is light and variable in direction unless smoke indicators show spray is entering the crop uniformly. Spray application should be carried out during the cooler parts of the day or night.

A spraydrift minimization strategy should be employed at all times when aurally applying sprays to, or near, sensitive areas. The strategy envisaged is exemplified by the cotton industry's Best Management Practice Manual.

Special instructions for Macadamias

Dilute Spraying:

- Use a sprayer designed to apply high volumes of water up to the point of run-off and matched to the crop being sprayed.
- Set up and operate the sprayer to achieve even coverage throughout the crop canopy. Apply sufficient water to cover the crop to the point of run-off. Avoid excessive run-off.
- The required water volume may be determined by applying different test volumes, using different settings on the sprayer, from industry guidelines or expert advice.
- Add the amount of Imtrade Cyborg™ 25 EC Insecticide specified in the Directions for Use table for each 100L of water. Spray to the point of run-off.
- The required dilute spray volume will change and the sprayer set up and operation may also need to be changed, as the crop grows.

Concentrate Spraying:

- Use a sprayer designed and set up for concentrate spraying (that is a sprayer which applies water volumes less than those required to reach the point of run-off) and matched to the crop being sprayed.
- Set up and operate the sprayer to achieve even coverage throughout the crop canopy using your chosen water volume.
- Determine an appropriate dilute spray volume (see Dilute Spraying above) for the crop canopy. This is needed to calculate the concentrate mixing rate.
- The mixing rate for concentrate spraying can then be calculated in the following way:

EXAMPLE ONLY

1. Dilute spray volume as determined above: for example 1500L/ha
 2. Your chosen concentrate spray volume: for example 500L/ha
 3. The concentrate factor in this example is 3X (i.e. $1500L \div 500L = 3$)
 4. If the dilute label rate is 25 mL/100L, then the concentrate rate becomes 3×25 , that is 75 mL/100L of concentrate spray.
- The chosen spray volume, amount of product per 100L of water, and the sprayer set and operation may need to be changed as the crop grows.
 - **DO NOT** use a concentrate rate higher than that specified in the Critical Comments.
 - For further information of concentrate spraying, users are advised to consult relevant industry guidelines, undertake appropriate competency training and follow industry Best Practices.

COMPATIBILITY

Imtrade Cyborg™ 25 EC Insecticide is compatible with most commonly used insecticides and fungicides. **DO NOT** mix concentrates together but add each to the spray tank separately. As formulations of other manufacturers' products are beyond the control of Imtrade Australia Pty Ltd, all mixtures should be tested prior to mixing commercial quantities. As changes in climatic conditions can alter the sensitivity of plants to mixtures of sprays, Imtrade Australia Pty Ltd cannot be responsible for the behavior of such mixtures.

INSECTICIDE RESISTANCE WARNING

GROUP 3A INSECTICIDE

Some naturally occurring insect biotypes resistant to Imtrade Cyborg™ 25 EC Insecticide and other Group 3A Insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if Imtrade Cyborg™ 25 EC Insecticide or other Group 3A Insecticides are used repeatedly. The effectiveness of Imtrade Cyborg™ 25 EC Insecticide on resistant individuals could be significantly reduced. Since the occurrence of resistant individuals is difficult to detect prior to use, Imtrade Australia Pty Ltd accepts no liability for any losses that may result from the failure of Imtrade Cyborg™ 25 EC Insecticide to control resistant insects.

Imtrade Cyborg™ 25 EC Insecticide may be subject to specific resistance management strategies. For further information contact your local supplier, Imtrade Australia Pty Ltd representative or local agricultural department agronomist. Application of Imtrade Cyborg™ 25 EC Insecticide to synthetic pyrethroid resistant larvae longer than 5mm will not only be ineffective but it may increase the level of synthetic pyrethroid resistance.

PROTECTION OF LIVESTOCK

Dangerous to bees.

DO NOT spray any plants in flower while bees are foraging.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Very toxic to aquatic life.

DO NOT contaminate wetlands or watercourses with this product or used container.

STORAGE AND DISPOSAL

The method of disposal of the container depends on the container type. Read the Storage and Disposal instructions on the label that is attached to the container.

Store in the closed, original container in a cool, well-ventilated area. **DO NOT** store for prolonged periods in direct sunlight.

All non-refillable containers (unless otherwise specified)

Triple rinse containers before disposal. Add rinsings to spray tank. **DO NOT** dispose of undiluted chemical on-site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and deliver empty packaging for appropriate disposal to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations. Empty containers and product should not be burnt. **DO NOT** re-use empty container for any other purpose.

Envirodrum - Micro Matic Valve (110L)

Store the original sealed Envirodrum in a cool, well ventilated area. **DO NOT** store for prolonged periods in direct sunlight. **DO NOT** tamper with the Micro Matic valve or the security seal. **DO NOT** contaminate the Envirodrum with water or any other foreign matter. After each use of the product please ensure that the Micro Matic coupler, delivery system and hoses are disconnected, triple rinsed with clean water and drained accordingly. When the contents of the Envirodrum have been used, please return the empty Envirodrum to the point of purchase.

SAFETY DIRECTIONS

Poisonous if swallowed. Avoid inhaling vapour or spray mist. Will damage eyes and skin. Avoid contact with eyes and skin. When opening container and preparing spray and using the prepare spray wear cotton overalls buttoned to the neck and wrist and washable hat, elbow-length PVC gloves and face shield or goggles. If clothing becomes contaminated with product remove clothing immediately. If product on skin, immediately wash area with soap and water. If product in eyes, wash it out immediately with water. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each day's use, wash gloves, face shield or goggles and contaminated clothing.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. (Phone Australia 13 11 26). If swallowed **DO NOT** induce vomiting. Give a glass of water. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. Remove from contaminated area. Apply artificial respiration if not breathing. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

Additional GHS Hazard & Precautionary Statements

•Flammable liquid and vapour; •Repeated exposure may cause skin dryness or cracking; •Causes skin irritation; •Causes eye irritation; •Toxic if inhaled; •May cause respiratory irritation; •May cause drowsiness or dizziness; •Very toxic to aquatic life with long lasting effects; •Keep away from heat, sparks, open flames and hot surfaces – No smoking; •Ground/bond container and receiving equipment; •Use explosion-proof electrical ventilating, lighting and other equipment; •Use only non-sparking tools; •Take precautionary measures against static discharge; •Avoid breathing fumes or mists; •**DO NOT** get on clothing; •**DO NOT** eat, drink or smoke when using this product; •Use only outdoors or in a well-ventilated area; •Call a POISON CENTRE or doctor if you feel unwell; •**IF INHALED:** Remove victim to fresh air and keep at rest in a position comfortable for breathing; •If skin irritation occurs: Get medical advice; If eye irritation persists: •Get medical advice; •Collect spillage; •In case of fire, use carbon dioxide, dry chemical, foam, water fog. Alcohol resistant foam is the preferred firefighting medium but, if it is not available, normal foam can be used; •Store in a dry place.

SAFETY DATA SHEET

Additional information is listed in the Safety Data Sheet, which can be obtained from your supplier or from our website at www.imtrade.com.au
