DIRECTIONS FOR USE

In W.A. only - for use by Bulk Handling Authorities only.

SITUATION	INSECT	RATE	CRITICAL COMMENTS
Stored cereal grains (except maize, malting barley and rice)	Lesser grain borer, Rice weevil, Granary weevil, Rust-red flour beetle, Confused flour beetle, Saw-toothed grain beetle, Tropical warehouse moth, Maize weevil	For 3-9 months' protection: 2 L/100 L water.	Apply 1 L of diluted spray per tonne of grain. Apply through standard grain spraying machinery. The output of spray through the nozzle must be regulated according to the flow of the grain.
Surface of buildings, bins and machinery used for grain storage (except maize, malting barley and rice))	Warehouse beetle, Rice weevil, Granary weevil, Rust-red flour beetle, Saw-toothed grain beetle, Tropical warehouse moth, Lesser grain borer (susceptible strains) Maize weevil	20 mL / 1 L water	Spray infested areas to point of run-off. 5 L of diluted spray will treat approximately 100 m ² . Repeat application at 6-week intervals when required.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

WITHHOLDING PERIOD: NOT REQUIRED WHEN USED AS DIRECTED

Dow AgroSciences

GENERAL INSTRUCTIONS

INSECTICIDE RESISTANCE WARNING

GROUP 1B | 7A INSECTICIDE

For insecticide resistance management Reldan pluS IGR Grain Protector is both a Group 1B and Group 7A insecticide.

Some naturally occurring insect biotypes resistant to Reldan pluS IGR Grain Protector and other Group 1B and 7A insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if Reldan pluS IGR Grain Protector or other Group 1B & 7A insecticides are used repeatedly. The effectiveness of Reldan pluS IGR Grain Protector on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to detect prior to use, Dow AgroSciences Australia Limited accepts no liability for any losses that may result from the failure of Reldan pluS IGR Grain Protector to control resistant insects.

MIXING

Slowly add the required amount of Reldan pluS IGR Grain Protector to the water in the tank. Use clean water only. The special formulation ensures rapid mixing.

APPLICATION ON STORED CEREAL GRAIN

Uniform application through the grain is essential for maximum efficacy. It is essential to ensure that the grain is free from infestation and of sufficiently low moisture content at intake i.e. less than 12% moisture and a storage temperature below 27°C.

EXPORT OF TREATED PRODUCE

Users should note that suitable MRLs or import tolerances may not have been established in all markets for produce treated with Reldan pluS IGR Grain Protector. Before treating grain for export, please check with Dow AgroSciences for the latest information on MRLs and import tolerances.

PRECAUTION

DO NOT contaminate food, feed or domestic water supplies.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Dangerous to fish and other aquatic organisms.

DO NOT contaminate streams, rivers or waterways with the chemical or used containers.

STORAGE AND DISPOSAL

Store in closed, original container in a cool, well-ventilated area. Do not store for prolonged periods in direct sunlight.

This container can be recycled if it is clean, dry, free of visible residues and has the **drumMUSTER** logo visible. Triple or pressure rinse container for disposal. Dispose of rinsate by adding to the spray tank. Do not dispose of undiluted chemicals on site. Wash outside of the container and the cap. Store cleaned container in a sheltered place with cap removed. It will then be acceptable for recycling at any **drumMUSTER** collection or similar container management site. The cap should not be replaced but may be taken separately. If not recycling, break, crush or puncture and deliver empty packaging for appropriate disposal to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations. **DO NOT** burn empty containers or product.

SMALL SPILL MANAGEMENT

Wear protective equipment (see SAFETY DIRECTIONS). Apply absorbent material such as earth, clay granules, and/or cat litter to the spill. Sweep up material for disposal when absorption is completed and contain in a refuse vessel for disposal in the same manner as for containers (see STORAGE AND DISPOSAL section). If spilled inside a building wash contaminated surfaces to deactivate the chlorpyrifos-methyl with a solution of bleach (sodium hypochlorite) prepared according to the bleach label instructions for normal cleaning purposes.

SAFETY DIRECTIONS

- Product is poisonous if absorbed by skin contact or swallowed.
- Avoid contact with eyes and skin.
- Do not inhale spray mist.
- When opening the container, preparing the spray and using the prepared spray wear cotton overalls buttoned to the neck and wrist and a washable hat, elbow-length PVC gloves and faceshield or goggles.
- If product on skin, immediately wash area with soap and water.
- After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water.
- After each day's use, wash gloves, face shield or goggles and contaminated clothing.

FIRST AID

If swallowed, splashed on skin or in eyes, or inhaled, contact a Poisons Information Centre.

Phone: *Australia* 13 11 26 or a doctor at once.

Remove any contaminated clothing and wash skin thoroughly. If swallowed, activated charcoal may be advised. Give atropine if instructed.

If in eyes, hold eyes open, flood with water for 15 minutes and see a doctor.
