

Broadstrike plus Diuron

See individual components, Broadstrike and Diuron flowable, for Label, MSDS and further Information.

Rates quoted in HerbiGuide are for a 1:4 mixture of Broadstrike plus Flowable Diuron 500. 125 mL of the mixture is equivalent to 25 grams of Broadstrike plus 100 mL of Flowable Diuron 500.

Similarly 125 mL of the mixture is equivalent to 25 grams of Broadstrike plus 55 grams of Diuron 900 Granules.

This mixture has been developed because of its superior control of Spiny Emex in clover based pastures.

CHEMICAL GROUP: B, C.
