**GENERAL INSTRUCTIONS****STORAGE AND DISPOSAL  
(2.5L, 5L, 10L, 20L, 200L only)**

Store in the closed, original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight.

Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point.

If not recycling, break, crush or puncture and bury the empty containers in a local authority landfill. If no landfill is available, bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.

***Envirodrum 110L Mini Bulk Returnable Container***

Store the original sealed Envirodrum in a cool well ventilated area. DO NOT store for prolonged periods in direct sunlight. DO NOT tamper with the Micro Matic valve or the security seal. DO NOT contaminate the Envirodrum with water or any foreign matter. After each use of the product, please ensure that the Micro Matic coupler delivery system and hoses are disconnected, triple rinsed with clean water and drained accordingly. When the contents of the Envirodrum have been used, please return the empty Envirodrum to the point of purchase. The Envirodrum remains the property of Nufarm Australia Limited.

**SAFETY DIRECTIONS**

May irritate the eyes and skin. Avoid contact with eyes and skin. When opening container and preparing spray wear elbow-length PVC gloves and face shield or goggles. If product on skin, immediately wash area with soap and water. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each day's use, wash gloves and face shield or goggles and contaminated clothing.

**ADDITIONAL RESTRAINTS FOR CONSERVATION TILLAGE**

- When grass and broadleaf weeds are present, use a mixture of KAMBA and Roundup\* CT or Glyphosate CT.
- DO NOT disturb treated weeds by cultivation, sowing or grazing for 1 day after treatment of annual weeds and 7 days for perennial weeds.
- DO NOT treat weeds heavily covered with dust or silt.
- DO NOT apply if rainfall is likely within 6 hours of application.
- Observe plant back periods listed under General Instructions.
- When applying to dry soil surfaces, at least 15mm rainfall is required before the plant back period begins.

**NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.**

**WITHHOLDING PERIOD: DO NOT HARVEST, GRAZE OR CUT FOR STOCK FOOD FOR 7DAYS AFTER APPLICATION.**

**GENERAL INSTRUCTIONS:**

Spray when weeds are young and actively growing, and unless stated otherwise, before the 3-5 true leaf stage.

**MIXING**

Add the required amount of the product directly to the spray tank and mix well.

**APPLICATION**

For Boom Application: Apply by a properly calibrated boom spray using not less than 50L of water/ha unless indicated otherwise in Critical Comments column.

For Aerial Application: Apply at least 25L total spray volume/ha. The aircraft should fly as low as practical under the prevailing conditions to minimise drift.

For High Volume Application: Apply minimum 1500L/ha.

For Knapsack Application: A 15L knapsack treats 150m<sup>2</sup>.

**MIMOSA CONTROL**

**Broadacre application** - Apply 2-2.4L/ha in 60L water/ha. Helicopter application preferred.

**High Volume application** - Apply 400mL in 110L water using ground equipment. Thoroughly wet all leaves and stems of the plant.

**Basal Bark application** - Apply 60mL in 15L water to plants of less than 5cm basal diameter. Spray liberally all around the base and 25-40cm up the stem.

**Cut Stump application** - Apply 60mL in 15L water on plants up to 10cm basal diameter. Cut trees as close to ground level as is possible and spray the freshly cut surface before the sap dries.

**Note:** A temporary wilting may be evident in crops after application. If seasonal conditions are late or dry seek further advice before spraying as damage may result from spraying crops under these conditions. Growers should seek advice before spraying recently released cereal varieties. Certain maize varieties may develop clubfoot of the prop roots.

**RESISTANT WEEDS WARNING**

KAMBA 500 Herbicide is a member of the Benzoic acid group of herbicides. KAMBA 500 has the Disruptor of plant cell growth mode of action. For weed resistance management KAMBA 500 is a Group I Herbicide. Some naturally-occurring weed biotypes resistant to KAMBA 500 and other Group I herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by KAMBA 500 or other Group I Herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Nufarm Australia Limited accepts no liability for any losses that may result from the failure of KAMBA 500 to control resistant weeds.

**PLANT BACK PERIODS for Conservation Tillage**

Wait for the following periods before planting the following crops into soils sprayed with the product. If applied to a dry soil, at least 15mm of rainfall is required before the Plant Back Period begins.

**Note:** if water-logging occurs shortly after sowing, the product may cause some reduction in crop vigour. Use as directed only in the States indicated.

**COMPATIBILITY**

KAMBA 500 is compatible with Flowable Igran\*, Roundup\* Max, Roundup\* CT, Roundup^, Nufarm Glyphosate CT, Weedmaster® Duo, Credit®/Bonus®, Glean\*/Lusta, Ally\*/Associate®, Amicide® 625, LV Estericide® 600, Estericide® 800, Diuron (900DF and Flowable), Ordram\* (Molinate), LVE MCPA.

Also compatible with Nu-trazine (900DF and Flowable) and other Atrazines, but when used in combination with these products some temporary visible effects in the crop growth may be observed.

**PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS**

DO NOT apply under weather conditions or from spraying equipment that may cause spray to drift onto nearby susceptible plants/crops, cropping lands or pastures. Spray equipment must be calibrated accurately prior to working on crops. Keep container sealed (airtight) when not in use. To prevent damage, DO NOT permit drift or vapour or spray mist to come into contact with fruit and ornamental trees, vines, vegetables, flowers, tobacco or any other field crop. Minimise spray drift by using low pressure and nozzles which DO NOT give a fine droplet size. DO NOT apply this product on or near desirable trees or plants or in locations where the chemical may be washed or moved into contact with their roots. DO NOT use in high wind. All spray equipment must be thoroughly washed out after use and must not be used for spraying horticultural crops. DO NOT use at higher rate than recommended.

**PROTECTION OF LIVESTOCK, WILDLIFE, FISH, CRUSTACEA AND ENVIRONMENT**

DO NOT use container for any other purpose. DO NOT contaminate streams, rivers or waterways with the chemical or used containers.

**STORAGE AND DISPOSAL**

Store in the closed, original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight.

Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point.

If not recycling, break, crush or puncture and bury the empty containers in a local authority landfill. If no landfill is available, bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.

**Envirodrum 110L Mini Bulk Returnable Container (110 only)**

Store the original sealed Envirodrum in a cool well ventilated area. DO NOT store for prolonged periods in direct sunlight. DO NOT tamper with the Micro Matic valve or the security seal. DO NOT contaminate the Envirodrum with water or any foreign matter. After each use of the product, please ensure that the Micro Matic coupler delivery system and hoses are disconnected, triple rinsed with clean water and drained accordingly. When the contents of the Envirodrum have been used, please return the empty Envirodrum to the point of purchase. The Envirodrum remains the property of Nufarm Australia Limited.

**SAFETY DIRECTIONS**

May irritate the eyes and skin . Avoid contact with eyes and skin. When opening container and preparing spray wear elbow-length PVC gloves and face shield or goggles. If product on skin, immediately wash area with soap and water. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each day's use, wash gloves and face shield or goggles and contaminated clothing.

**FIRST AID**

If poisoning occurs, contact a doctor, or Poisons Information Centre (Phone **13 11 26**).

**MATERIAL SAFETY DATA SHEET**
