Barrier spraying	Redlegged earth mite (NSW, WA only)	300 mL/ha	To prevent invasion, spray bare earth outside crop as well as weeds along the fenceline using an offset jet. Note: Rain will reduce the efficacy of the bare earth treatment but leave an effective barrier on the weeds.

GENERAL INSTRUCTIONS

Before opening, carefully read Directions for Use, Precautionary Statements, Safety Directions and First Aid Instructions.

INSECTICIDE RESISTANCE WARNING

GROUP 1B INSECTICIDE

For insecticide management, Imtrade Omen 290 Insecticide is a Group **1B** Insecticide. Some naturally occurring insect biotypes resistant to Imtrade Omen 290 Insecticide and other Group **1B** Insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if Omen and other Group **1B** Insecticides are used repeatedly. The effectiveness of Imtrade Omen 290 Insecticide on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to detect prior to use, Imtrade Australia Pty Ltd accepts no liability for any losses that may result from the failure of Imtrade Omen 290 Insecticide to control resistant insects. Omen may be subject to specific resistance management strategies. For further information contact your local supplier, Imtrade Australia Pty Ltd representative or local agricultural department agronomist.
