EverGol® Xtend

SEED TREATMENT

ACTIVE CONSTITUENTS: 154 g/L PENFLUFEN
154 g/L TRIFLOXYSTROBIN

GROUP 7 11 FUNGICIDE

For the control or suppression of damping off or hypocotyl rot in various crops as specified in the **DIRECTIONS FOR USE** table

DIRECTIONS FOR USE

CROP	DISEASE	RATE	WHP	CRITICAL COMMENTS
Canola, Forage brassicac	Damping off and hypocotyl rot caused by <i>Rhizoctonia solani</i> Fusarium damping off and root rot (<i>Fusarium</i> spp.)	65 mL/100 kg seed	(H) Nil (G) 6 weeks	EverGol Xtend is applied to seed prior to sowing. Ensure even coverage of seed. Control of <i>Rhizoctonia</i> and <i>Fusarium</i> by EverGol Xtend is characterised by improved plant emergence and survival, a reduction in hypocotyl damage and an increase in above ground biomass.
Broadleaf pasture	Rhizoctonia damping off and root rot (<i>Rhizoctonia solani</i>) Fusarium damping off and root rot (<i>Fusarium</i> spp.)	35 mL/100 kg seed	(G) 6 weeks	EverGol Xtend will not control damping off caused by <i>Pythium</i> spp.
Grass pasture	Rhizoctonia damping off and root rot (<i>Rhizoctonia solani</i>)		(G) 4 weeks	
Cotton	Damping off caused by: Rhizoctonia damping off and root rot (<i>Rhizoctonia solani</i>) Fusarium wilt (<i>Fusarium oxysporum</i> f. sp. <i>vasinfectum</i>) Black root rot (<i>Thielaviopsis basicola</i>) Pythium (<i>Pythium</i> spp.) Phytophthora (<i>Phytophthora</i> spp.)	65 mL/100 kg seed plus 43 mL/100 kg seed of a 350 g/L metalaxyl-M seed treatment product	(H) Nil	The EverGol Xtend and metalaxyl-M mixture is applied with water to clean seed prior to sowing. Ensure even coverage of seed. The EverGol Xtend metalaxyl-M mixture will suppress fusarium wilt and black root rot and their symptoms. Control or suppression of rhizoctonia, black root rot, phytophthora, pythium and fusarium is characterised by improved plant emergence and survival, a reduction in root and hypocotyl damage and an increase in above ground crop biomass.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION

WITHHOLDING PERIODS

(H) Harvest:

All crops: NOT REQUIRED WHEN USED AS DIRECTED

(G) Grazing:

Grass pastures: DO NOT GRAZE PLANTS GROWN FROM TREATED SEED, OR CUT FOR STOCK FOOD WITHIN 4 WEEKS OF SOWING

Canola, forage brassicas, broadleaf and mixed broadleaf/grass pastures: DO NOT GRAZE PLANTS GROWN FROM TREATED SEED, OR CUT FOR STOCK FOOD WITHIN 6 WEEKS OF SOWING
Cotton: DO NOT GRAZE PLANTS GROWN FROM TREATED SEED OR FEED COTTON TRASH TO LIVESTOCK

GENERAL INSTRUCTIONS

Application – Canola, forage brassicas, grass and broadleaf pasture

Prior to pouring, shake the container vigorously, then add the required quantity of EverGol Xtend to sufficient water to give even coverage of the seed to be treated. Ensure that a high enough slurry volume is used to gain even coverage on each seed. Place seed in seed treatment equipment and operate until even coverage of seed is obtained. The quantity of water used for mixing will vary depending on type of equipment and the type of seed to be treated. Refer to Bayer for specific treatment information. Good coverage of seed can be obtained with lower slurry volumes when professional seed treatment equipment is used. The slurry mixture should be gently stirred regularly.

Application – Cotton

Prior to pouring, shake the container vigorously, then add the required quantity of EverGol Xtend and metalaxyl-M 350 seed treatment and any other mixing partners to sufficient water to give even coverage of the seed to be treated. Ensure that a high enough slurry volume is used to gain even coverage of seed is obtained. The quantity of water used for mixing will vary depending on the type of equipment used and the specific seed sample to be treated. Refer to Bayer for specific treatment information. The slurry mixture should be gently stirred regularly.

Seed Quality

EverGol Xtend seed treatment should not be used on seed with more than 8% moisture content, or on sprung, sprouted, damaged or severely pinched seed, or seed of poor viability. If in doubt, have a germination test carried out on the seed before treatment to ensure that it is of acceptable standard.

Treating with EverGol Xtend as directed will raise the moisture level of the seed by up to 1%, depending on weather conditions at treatment. The use of EverGol Xtend mixed with water at recommended rates will have no effect on the storage life of treated sound seed.

Storage of Treated Seed

Bayer recommends that treated seed be sown in the year of treatment. If the seed cannot be sown in the year of treatment it should be stored in a cool, dry, well ventilated place. It is good agronomic practice that a germination test be carried out prior to using carry-over seed from the previous planting season to ensure it is still fit for purpose. No liability can be accepted for the performance of treated seed stored for extended periods.

Compatibility

EverGol Xtend is compatible with Jockey® Stayer® and Gaucho® 600 FS when applied to canola and compatible with Gaucho 600 FS when applied to forage brassicas.

EverGol Xtend is compatible with Gaucho 600 FS when applied to grass and broadleaf pasture and with Apron® XL when applied to lucerne and sub-clover pasture.

EverGol Xtend Seed Treatment is compatible with Apron XL 350 ES, Gaucho 600 FS, Amparo® 600 FS, Cruiser® 600 FS and Bion® when applied to cotton seed. Three-way tank mixes of EverGol Xtend plus Apron 350 FS plus either Gaucho 600 FS, Amparo 600 FS, Cruiser 600 FS and Bion when applied to cotton seed have been shown to be compatible.

For information concerning the compatibility of EverGol Xtend Seed Treatment with other products please contact Bayer CropScience Pty Ltd.

Labelling of Treated Seed

Label treated seed with the appropriate precautions using printed sacks, labels or bag tags.

Cleaning Up

Equipment should be thoroughly cleaned with water. In the event of changing from this water based flowable formulation to a solvent-based liquid formulation, it is essential to rinse equipment with methylated spirits after thoroughly cleaning with water. If changing from a solvent based liquid to this water based flowable, thoroughly clean with methylated spirits then rinse with water. Failure to do so will result in clogging of equipment.

**FUNGICIDE RESISTANCE WARNING**

GROUP	7	11	FUNGICIDE
--------------	----------	-----------	------------------

EverGol Xtend is a combination of carboximide and strobilurin fungicide. For fungicide resistance management EverGol Xtend is both a Group 7 and Group 11 fungicide. Some naturally occurring individual fungi resistant to EverGol Xtend and other Group 7 and/or Group 11 fungicides may exist through normal genetic variability in any fungal population. The resistant individuals can eventually dominate the fungal population if these fungicides are used repeatedly. These resistant fungi will not be controlled by this product and other Group 7 and/or Group 11 fungicides, thus resulting in a reduction in efficacy and possible yield loss. Since the occurrence of resistant fungi is difficult to detect prior to use, Bayer CropScience Pty Ltd accepts no liability for any losses that result from failure of EverGol Xtend to control resistant fungi.

PRECAUTION

Do not use treated seed for human or animal consumption. Do not allow treated seed to contaminate seed intended for human or animal consumption. If possible, use a separate auger for treating seed or moving treated seed. If using the same auger for treating seed or moving treated seed and moving grain for human consumption, remove all EverGol Xtend residues from the auger to avoid contaminating untreated seed with seed treatment residues.

Re-handling

Do not allow re-handling of treated seed unless wearing cotton overalls buttoned to the neck and wrist (or equivalent clothing) and impervious footwear and chemical resistant gloves. Clothing must be laundered after each day's use.

PROTECTION OF LIVESTOCK

Seed treated with this product must not be used for animal consumption or poultry feed or mixed with animal feed. DO NOT allow seed treated with this product to contaminate seed intended for animal consumption.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Very toxic to aquatic life. DO NOT contaminate wetlands or watercourses with this product, used containers or bags which have held treated seeds. DO NOT feed treated seed or otherwise expose to wild or domestic birds. Any spillages of treated seed, however minor, must be cleaned up immediately, preferably by recovery and re-use. If disposal is required, ensure treated seeds are thoroughly buried and not accessible to birds and other wildlife.

STORAGE AND DISPOSAL**Product and Original Container**

Store in the closed, original container in a cool, well-ventilated area. Do not store for prolonged periods in direct sunlight. Do not store near foodstuffs or animal feed.

The method of disposal of the container depends on the container type. Read the STORAGE AND DISPOSAL instructions on the label that is attached to the container.

Treated Seed and Containers of Treated Seed

When treated seed is stored it should be kept apart from other grain and the bags or containers should be clearly marked to indicate the contents have been treated with this product. DO NOT use treated seed for human or animal consumption. Do not allow treated seed to contaminate seed intended for human or animal consumption. Bags which have held treated seed are not to be used for any other purpose.

SAFETY DIRECTIONS

Will irritate the eyes and skin. Repeated exposure may cause allergic disorders. Avoid contact with eyes and skin. When opening the container, mixing and loading and using the product wear cotton overalls buttoned to the neck and wrist (or equivalent clothing) and elbow length chemical resistant gloves and face shield or goggles and impervious footwear. If product on skin, immediately wash area with soap and water and in eyes, wash it out immediately with water. Wash hands after use. After each day's use wash gloves and face shield or goggles and contaminated clothing.

FIRST AID

If poisoning occurs contact a doctor or Poisons Information Centre (13 11 26).

SAFETY DATA SHEET

Additional information is listed in the Safety Data Sheet, which can be obtained from www.crop.bayer.com.au.

EXCLUSION OF LIABILITY

This product must be used strictly as directed, and in accordance with all instructions appearing on the label and in other reference material. So far as it is lawfully able to do so, Bayer CropScience Pty Ltd accepts no liability or responsibility for loss or damage arising from failure to follow such directions and instructions.

EverGol® Jockey® Stayer® and Gaucho® are Registered Trademarks of the Bayer Group.
