TITAN
Quizalofop-P-Ethyl
99.5 Herbicide

ACTIVE CONSTITUENT: 99.5g/L QUIZALOFO-P-ETHYL
SOLVENT: 802g/L HYDROCARBON LIQUID

GROUP A HERBICIDE

For the control of certain grass weeds in broadleaf crops as per Directions for Use table.

IMPORTANT: READ THOROUGHLY BEFORE OPENING OR USING THIS PRODUCT.

APVMA Approval No.: 53609/50018

Pack Size: 5L, 10L, 20L

TITAN AG Pty Ltd

POLICE OR FIRE BRIGADE

TRANSPORT AND HANDLING
NOT A DANGEROUS GOOD
ACCORDING TO THE AUSTRALIAN DANGEROUS GOODS (ADG) CODE
FOR TRANSPORT BY ROAD AND RAIL.
### DIRECTIONS FOR USE

**Restraints:**
- DO NOT apply to crops that are stressed by any cause (such as severe cold weather, disease, drought or waterlogging).
- DO NOT apply to weeds that are stressed by any cause (such as weather conditions, drought, waterlogging) or not actively growing. Grass weeds under stress frequently become less susceptible to herbicide activity. This may result in an incomplete kill or suppression of weeds only.
- DO NOT apply under conditions of high temperature and low humidity.
- DO NOT apply if rainfall is expected within 3 hours.

**WITHHOLDING PERIOD**
- Apply when weeds are actively growing.

**BOOM SPRAYING: WINTER GROWING WEEDS: ALL STATES.**

#### CRITICAL COMMENTS

**CRITICAL COMMENTS**
- Apply when weeds are actively growing. Use lower rate under heavy weed pressure and/or when weeds are at the 1-3 leaf stage. Use higher rate under heavy weed pressure and/or when weeds are tillering. The higher rate will give better or more reliable control.*

#### CRITICAL COMMENTS

- Always add a surfactant/wetting agent at the recommended rate. See section on “use of surfactant/wetting agent” for details.
- IMPORTANT: DO NOT apply TITAN Quizalofop-P-Ethyl 99.5 Herbicide before the five true leaf stage of the crop.

---

TITAN QUIZALOFOP-P-ETHYL 99.5 HERBICIDE • PAGE 2 OF 4
WITHHOLDING PERIOD

HARVEST

BEETROOT, CAULIFLOWER, CUCUMBERS: DO NOT HARVEST FOR 14 DAYS BEFORE HARVEST.
CABBAGE, FIELD PEAS, HONEY DEW MELON, PUMPKINS, SUNFLOWERS: DO NOT APPLY LATER THAN 9 WEEKS BEFORE HARVEST.
CARROTS, POTATOES: DO NOT APPLY LATER THAN 10 WEEKS BEFORE HARVEST.
CHICKPEAS, FABA BEANS, LENTILS, MUNG BEANS, NAVY BEANS, VETCH, SOY BEAN: DO NOT APPLY LATER THAN 12 WEEKS BEFORE HARVEST.
CANOLA, PEANUTS: DO NOT APPLY LATER THAN 11 WEEKS BEFORE HARVEST.
GREEN BEANS: DO NOT APPLY LATER THAN 5 WEEKS BEFORE HARVEST.
LUPINS: DO NOT APPLY LATER THAN 6 WEEKS BEFORE HARVEST.
ONIONS: DO NOT APPLY LATER THAN 18 WEEKS BEFORE HARVEST.
PINEAPPLES: DO NOT APPLY LATER THAN 7 DAYS BEFORE HARVEST.
RADISH: DO NOT APPLY LATER THAN 21 DAYS BEFORE HARVEST.
TOMATOES: DO NOT APPLY LATER THAN 4 WEEKS BEFORE HARVEST.

GRAZING

CANOLA, CHICKPEAS, FABA BEANS, FIELD PEAS, GREEN BEANS, LENTILS, LUCERNE, LUPINS, MUNG BEANS, NAVY BEANS,
SOYBEANS, VETCH: DO NOT GRAZE OR CUT FOR STOCK FEED FOR 28 DAYS AFTER APPLICATION.
CLOVER, MEDIC PASTURES (EXCEPT LUCERNE), SUB CLOVER: DO NOT GRAZE OR CUT FOR STOCK FEED FOR 14 DAYS AFTER APPLICATION.
PEANUTS, SUNFLOWERS: DO NOT GRAZE OR CUT FOR STOCK FEED FOR 11 WEEKS AFTER APPLICATION.
TITAN Quizalofop-P-Ethyl 99.5 Herbicide is an emulsifiable concentrate herbicide used post emergence for the control of certain grass weeds in specified broadleaf crops. TITAN Quizalofop-P-Ethyl 99.5 Herbicide is a systemic herbicide, which is rapidly absorbed and readily translocates from the treated foliage to the root system and growing points of the plant. Applications made to grass weeds stressed due to insufficient moisture or cold temperatures may result in unsatisfactory control.

RESISTANT WEEDS WARNING
TITAN Quizalofop-P-Ethyl 99.5 Herbicide is a member of the “Fop” (arylxyphenoxy propionate) group of herbicides. TITAN Quizalofop-P-Ethyl 99.5 Herbicide has the inhibitors of acetyl coA carboxylase mode of action. For weed resistance management TITAN Quizalofop-P-Ethyl 99.5 Herbicide is a Group A Herbicide. Some naturally occurring weed biotypes resistant to TITAN Quizalofop-P-Ethyl 99.5 Herbicide and other Inhibitors of acetyl coA carboxylase herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by TITAN Quizalofop-P-Ethyl 99.5 Herbicide or other inhibitors of acetyl coA carboxylase.

Since the occurrence of resistant weeds is difficult to detect prior to use, TITAN AG Pty Ltd accepts no liability for any losses that may result from failure of TITAN Quizalofop-P-Ethyl 99.5 Herbicide to control resistant weeds. Strategies to minimise the risk of herbicide resistance are available. Consult your farm chemical supplier, consultant, local Department of Agriculture or Primary Industries or local TITAN AG Representative.

TIME OF APPLICATION
For maximum benefit, weeds should be sprayed when young and actively growing. Application may be made at any stage of crop growth (except to curcurbit crops), but sufficient time must be allowed for the prescribed withholding period to expire before harvest and/or grazing or cutting for stockfeed. IMPORTANT: DO NOT apply TITAN Quizalofop-P-Ethyl 99.5 Herbicide to curcurbit crops before the five true leaf stage.

SPRAY PREPARATION
If spray equipment has been previously used for the application of sulfonylurea herbicides eg TITAN Metsofuran 600 WG, TITAN Trisulfuron 750 WG Herbicide, TITAN Chlorsulfuron 750 WG, ensure that the recommended spray cleanup procedure for the product previously sprayed has been followed, before using the equipment for the application of TITAN Quizalofop-P-Ethyl 99.5 Herbicide.

USE OF A SURFACTANT/WETTING AGENT
TITAN Quizalofop-P-Ethyl 99.5 Herbicide may be used with either of the following adjuvant system:
1) A non-ionic surfactant (1000 gai/L strength) at 100 mL/100L (i.e. 0.1% v/v) and a mineral spray oil at 1 L/100L of final spray volume (ie 1% v/v).
2) A non-ionic surfactant (1000 gai/L) at 200 mL/100L of final spray volume (i.e. 0.2% v/v).

DO NOT use non-ionic surfactant + mineral oil adjuvant system on vegetable crops, use a non-ionic surfactant only. DO NOT use non-methylated spray oils of crop origin (eg Coccicide oil, Synetrol oil) as spray adjuvants.

COMPATIBILITIES
TITAN Quizalofop-P-Ethyl 99.5 Herbicide is compatible with the Sertin® 186 EC, Sertin® Plus, Grasidim® and Select®. The recommended surfactant/wetting agent for these tank mixes is the non-ionic surfactant and mineral spray oil adjuvant system. TITAN Quizalofop-P-Ethyl 99.5 Herbicide is compatible with the insecticides deltamethrin, Le-mat®, Rogor®, methomyl, endosulfan, the fungicides carbendazim and mancozeb and the herbicide clopyralid when using the non-ionic surfactant and mineral oil adjuvant system.

TITAN Quizalofop-P-Ethyl 99.5 Herbicide is compatible with the herbicide diflufenican when used with the non-ionic surfactant only adjuvant system. DO NOT add crop oil to tank mixes of TITAN Quizalofop-P-Ethyl 99.5 Herbicide/diflufenican. Application of TITAN Quizalofop-P-Ethyl 99.5 Herbicide/diflufenican tank mix may result in temporary crop effects, which usually appear as yellow or white bleaching on the leaves. New growth and subsequent yield, however, will not be affected.

TO MINIMISE CROP EFFECTS
To minimise crop effects apply TITAN Quizalofop-P-Ethyl 99.5 Herbicide a minimum of 5 days prior to diflufenican application or a minimum of 10 days after diflufenican application. (14-21 days if weeds have been stressed).

GROUND SPRAYING
Use sprayers with flat fan or hollow cone nozzles at 210-350 kPa to give an even distribution of droplets with no less than 50% of the spray volume in the 150-300 micron range. 110° flat fan nozzles are preferred. Use between 50 and 100 litres of prepared spray/ha, the higher spray volume gives more reliable results. If weeds are large and the crop canopy is dense, increase the volume to 150 litres prepared spray/ha. For proper spray coverage adjust the boom and nozzle height according to the specification listed by the nozzle manufacturer. Ensure the spray is evenly distributed and a double overlap spray pattern is obtained. Avoid overlapping boomspray widths and shut off spray booms while starting, slowing or stopping.

SPRAYER CLEANUP
Thoroughly clean all traces of TITAN Quizalofop-P-Ethyl 99.5 Herbicide from application equipment immediately after use. Flush tank, pump, hoses and boom with several changes of water after removing nozzle tips and screens (clean those parts separately). Failure to thoroughly clean the equipment may result in injury to subsequently sprayed cereal and grass crops.

PRECAUTION
Re-Entry Period: DO NOT allow entry into treated areas until the spray has dried. When prior entry is necessary, wear chemical resistant gloves. Clothing must be laundered after each day’s use.

PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS
DO NOT plant cereal crops into the treated area for a period of 18 weeks after application of TITAN Quizalofop-P-Ethyl 99.5 Herbicide. DO NOT apply under weather conditions, or from spraying equipment, that may cause spray to drift onto nearby susceptible plants/crops, cropping land or pastures.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT
DO NOT contaminate streams, rivers or waterways with the chemical or used containers.

STORAGE AND DISPOSAL
Store in the closed original container in a cool, well-ventilated area, as cool as possible. DO NOT store for prolonged periods in direct sunlight. DO NOT store tank-mixes of TITAN Quizalofop-P-Ethyl 99.5 Herbicide with other materials. When storing, keep from contact with fertilisers, fungicides and seeds. Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. If recycling, replace cap and return clean container to recycler or designated collection point. If not recycling, break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the container below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.

SAFETY DIRECTIONS
Will irritate the eyes and skin. When preparing spray wear cotton overalls, buttoned to the neck and wrist and a washable hat, and elbow-length PVC gloves and face shields or goggles. When preparing spray wear cotton overalls, buttoned to the neck and wrist and a washable hat, and elbow-length PVC gloves and face shields or goggles. When product in eyes, wash out immediately with water. Wash hands after use. After each day’s use wash gloves, face shields or goggles and contaminated clothing.

FIRST AID
If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26.

MATERIAL SAFETY DATA SHEET
Additional information is listed in the material safety data sheet (MSDS). A material safety data sheet for TITAN Quizalofop-P-Ethyl 99.5 Herbicide is available from TITAN AG Pty Ltd on request. Call Customer Service on (02) 9986 2943 or visit www.titanag.com.au

CONDITIONS OF SALE
TITAN AG Pty Ltd shall not be liable for any loss injury damage or death whether consequential or otherwise whatsoever or howsoever arising whether through negligence or otherwise in connection with the sale supply use or application of this product. The supply of this product is on the express condition that the purchaser does not rely on TITAN AG’s skill or judgment in purchasing or using the same and every person dealing with this product does so at his own risk absolutely. No representative of TITAN AG Pty Ltd has any authority to add to or alter these conditions.
