Situation	Weeds Controlled	State	General Rate/100L of water	Critical Comments
Commercial and Industrial Situations, Rights of Way, Pastures and Forests	Blackberry	Qld, NSW, Vic, SA, WA only	136 mL	Apply from late spring to early autumn when bushes are actively growing. Best results are achieved from application made between January and April. One application may give satisfactory control but subsequent regrowth and seedlings should be resprayed after hardening off. Where herbicides other than Imtrade Hurricane Ultimate 750 Herbicide or Imtrade Picker Herbicide have been used, allow two seasons regrowth to occur before respraying with Imtrade Hurricane Ultimate 750 Herbicide or Imtrade Picker Herbicide.
		Tas only	136 mL	Apply from petal fall to leaf fall except when bushes are carrying mature fruit. Application from mid-fruit stage to leaf fall may give improved control. Use the higher rate on large bushes when complete wetting is difficult.

RESISTANT WEEDS WARNING

GROUP	I	HERBICIDE
--------------	----------	------------------

Imtrade Hurricane Ultimate 750 Herbicide is a member of the Pyridines group of herbicides. Imtrade Hurricane Ultimate 750 Herbicide has the disruptors of plant cell growth mode of action. For weed resistance management, Imtrade Hurricane Ultimate 750 Herbicide is a Group I Herbicide. Some naturally occurring weed biotypes resistant to Imtrade Hurricane Ultimate 750 Herbicide and other Group I Herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by Imtrade Hurricane Ultimate 750 Herbicide or other Group I Herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Imtrade Australia Pty Ltd accepts no liability for any loss that may result from the failure of Imtrade Hurricane Ultimate 750 Herbicide to control resistant weeds.

RE-ENTRY PERIOD

DO NOT enter treated areas until the spray has dried unless wearing cotton overalls buttoned to the neck and wrist (or equivalent clothing) and chemical resistant gloves.

PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS

Imtrade Hurricane Ultimate 750 Herbicide is damaging to vines, vegetables, cotton, tomatoes, ornamentals and many other plants during both growing and dormant periods. Grasses are normally unaffected and establish quickly after treatment.

DO NOT allow spray to drift onto susceptible crops such as cotton, tomatoes, vines, fruit, potatoes, vegetables, ornamentals, tobacco, lupins and other legumes, safflower, flowers, shade trees and pinus spp.

DO NOT apply under meteorological conditions or from spraying equipment, which could be expected to cause spray to drift onto nearby susceptible plants.

PROTECTION OF LIVESTOCK, WILDLIFE, FISH, CRUSTACEANS AND THE ENVIRONMENT

DO NOT contaminate streams, rivers, waterways, water used for irrigation, drinking or other domestic purposes, with the chemical or used container.

The method of disposal of the container depends on the container type. Read the Storage and Disposal instructions on the label that is attached to the container.
