

# Section 1 - Identification of The Material and Supplier

Farmoz Pty Ltd, Suite 207 Pacific Highway S ACN 050 328 973	e 1, Level 4, Building B t Leonards, NSW 2068	Telephone (02)9431 7800 (24 hours) Fax (02)9431 7700
Chemical nature:	Active ingredient is a sulfonylurea of	lerived herbicide.
Trade Name:	Farmoz Excalibur Herbicide	)
APVMA Code:	58725	
Product Use:	Agricultural herbicide for use as de	scribed on the product label.
Creation Date:	December, 2005	
This version issued:	July, 2010 and is valid for 5 years	from this date.

# Section 2 - Hazards Identification

#### **Statement of Hazardous Nature**

This product is classified as: Not classified as hazardous according to the criteria of SWA Australia.

Not a Dangerous Good according to the Australian Dangerous Goods (ADG) Code.

Risk Phrases: Not Hazardous - No criteria found.

Safety Phrases: S22, S25. Do not breathe dust. Avoid contact with eyes.

SUSDP Classification: S5

ADG Classification: None allocated. Not a Dangerous Good under the ADG Code.

**UN Number:** None allocated

#### **Emergency Overview**

Physical Description & colour: Light brownish grey granulated solid.

Odour: No odour.

Major Health Hazards: Sulfometuron-methyl's acute oral toxicity is very low. The LD<sub>50</sub> of Sulfometuron methyl in rats is greater than 5000 mg/kg. One study showed an LD<sub>50</sub> greater than 17,000 mg/kg. The acute dermal toxicity of the compound is also low. The LD<sub>50</sub> values for exposure through the skin ranges from over 2000 mg/kg in female rabbits to over 8000 mg/kg in male rabbits. No significant risk factors have been found for this product.

### **Potential Health Effects**

### Inhalation

Short term exposure: Available data indicates that this product is not harmful. However product may be mildly irritating, although unlikely to cause anything more than mild transient discomfort.

Long Term exposure: No data for health effects associated with long term inhalation.

#### Skin Contact:

Short term exposure: Available data indicates that this product is not harmful. It should present no hazards in normal use. In addition product is unlikely to cause any discomfort in normal use.

Long Term exposure: No data for health effects associated with long term skin exposure.

### Eye Contact:

Short term exposure: This product is believed to be mildly irritating, to eyes, but is unlikely to cause anything more than mild transient discomfort.

Long Term exposure: No data for health effects associated with long term eye exposure.

#### Ingestion:

Short term exposure: Significant oral exposure is considered to be unlikely. However, this product may be irritating to mucous membranes but is unlikely to cause anything more than transient discomfort.

Long Term exposure: No data for health effects associated with long term ingestion.

#### Carcinogen Status:

**SWA:** No significant ingredient is classified as carcinogenic by SWA.

**NTP:** No significant ingredient is classified as carcinogenic by NTP.

**IARC:** No significant ingredient is classified as carcinogenic by IARC.

### MATERIAL SAFETY DATA SHEET

Issued by: Farmoz Pty Ltd

Phone: (02)9431 7800 Poisons Information Centre: 13 1126 from anywhere in Australia, (0800 764 766 in New Zealand)

# **Section 3 - Composition/Information on Ingredients**

Ingredients	CAS No	Conc,%	TWA (mg/m <sup>3</sup> )	STEL (mg/m <sup>3</sup> )
Sulfometuron methyl	74222-97-2	750g/kg	not set	not set
Other non hazardous ingredients	secret	to 100	not set	not set

This is a commercial product whose exact ratio of components may vary slightly. Minor quantities of other non hazardous ingredients are also possible.

The TWA exposure value is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5 day working week. The STEL (Short Term Exposure Limit) is an exposure value that may be equalled (but should not be exceeded) for no longer than 15 minutes and should not be repeated more than 4 times per day. There should be at least 60 minutes between successive exposures at the STEL. The term "peak "is used when the TWA limit, because of the rapid action of the substance, should never be exceeded, even briefly.

# **Section 4 - First Aid Measures**

#### **General Information:**

You should call The Poisons Information Centre if you feel that you may have been poisoned, burned or irritated by this product. The number is 13 1126 from anywhere in Australia (0800 764 766 in New Zealand) and is available at all times. Have this MSDS with you when you call.

**Inhalation:** First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor. **Skin Contact:** Irritation is unlikely. However, if irritation does occur, flush with lukewarm, gently flowing water for 5 minutes or until chemical is removed.

**Eye Contact:** Immediately flush the contaminated eye(s) with lukewarm, gently flowing water for 5 minutes or until the product is removed, while holding the eyelid(s) open. Obtain medical advice immediately if irritation occurs. Take special care if exposed person is wearing contact lenses.

**Ingestion:** If product is swallowed or gets in mouth, do NOT induce vomiting; wash mouth with water and give some water to drink. If symptoms develop, or if in doubt contact a Poisons Information Centre or a doctor.

# **Section 5 - Fire Fighting Measures**

**Fire and Explosion Hazards**: There is no risk of an explosion from this product under normal circumstances if it is involved in a fire.

Fire decomposition products from this product may be toxic if inhaled. Take appropriate protective measures. **Extinguishing Media:** Preferred extinguishing media are carbon dioxide, dry chemical, foam, water fog.

Fire Fighting: If a significant quantity of this product is involved in a fire, call the fire brigade.

Flash point:	Not flammable.
Upper Flammability Limit:	No data.
Lower Flammability Limit:	No data.
Autoignition temperature:	No data.
Flammability Class:	No data.

# **Section 6 - Accidental Release Measures**

Accidental release: In the event of a major spill, prevent spillage from entering drains or water courses. As a minimum, wear overalls, goggles and gloves. Suitable materials for protective clothing include rubber, PVC. Eye/face protective equipment should comprise as a minimum, protective glasses and, preferably, goggles. If there is a significant chance that vapours or mists are likely to build up in the cleanup area, we recommend that you use a respirator. Usually, no respirator is necessary when using this product. However, if necessary, we suggest a P1 dust mask.

Stop leak if safe to do so, and contain spill. Sweep up and shovel or collect recoverable product into labelled containers for recycling or salvage, and dispose of promptly. Recycle containers wherever possible after careful cleaning. Refer to product label for specific instructions. After spills, wash area preventing runoff from entering drains. If a significant quantity of material enters drains, advise emergency services. Full details regarding disposal of used containers, spillage and unused material may be found on the label. If there is any conflict between this MSDS and the label, instructions on the label prevail. Ensure legality of disposal by consulting regulations prior to disposal. Thoroughly launder protective clothing before storage or re-use. Advise laundry of nature of contamination when sending contaminated clothing to laundry.

# Section 7 - Handling and Storage

**Handling:** Keep exposure to this product to a minimum, and minimise the quantities kept in work areas. Check Section 8 of this MSDS for details of personal protective measures, and make sure that those measures are followed. The measures detailed below under "Storage" should be followed during handling in order to minimise risks to

#### **MATERIAL SAFETY DATA SHEET**

Issued by: Farmoz Pty Ltd

Phone: (02)9431 7800

Poisons Information Centre: 13 1126 from anywhere in Australia, (0800 764 766 in New Zealand)

Product Name: Farmoz Excalibur Herbicide Page: 3 of 5 This revision issued: July, 2010

persons using the product in the workplace. Also, avoid contact or contamination of product with incompatible materials listed in Section 10.

**Storage:** This product is a Scheduled Poison. Observe all relevant regulations regarding sale, transport and storage of this schedule of poison. Protect this product from light. Store in the closed original container in a dry, cool, well-ventilated area out of direct sunlight. Make sure that the product does not come into contact with substances listed under "Incompatibilities" in Section 10. Some liquid preparations settle or separate on standing and may require stirring before use. Check packaging - there may be further storage instructions on the label.

# **Section 8 - Exposure Controls and Personal Protection**

The following Australian Standards will provide general advice regarding safety clothing and equipment: Respiratory equipment: **AS/NZS 1715**, Protective Gloves: **AS 2161**, Industrial Clothing: **AS2919**, Industrial Eye Protection: **AS1336** and **AS/NZS 1337**, Occupational Protective Footwear: **AS/NZS2210**.

SWA Exposure Limits TWA (mg/m<sup>3</sup>)

STEL (mg/m<sup>3</sup>)

Exposure limits have not been established by SWA for any of the significant ingredients in this product.

The ADI for Sulfometuron methyl is set at 0.02mg/kg/day. The corresponding NOEL is set at 2.5mg/kg/day. ADI means Acceptable Daily Intake and NOEL means No-observable-effect-level. Values taken from Australian ADI List, Dec 2010.

No special equipment is usually needed when occasionally handling small quantities. The following instructions are for bulk handling or where regular exposure in an occupational setting occurs without proper containment systems. **Ventilation:** No special ventilation requirements are normally necessary for this product. However make sure that the work environment remains clean and that vapours and mists are minimised.

**Eye Protection:** Eye protection such as protective glasses or goggles is recommended when this product is being used.

**Skin Protection:** The information at hand indicates that this product is not harmful and that normally no special skin protection is necessary. However, we suggest that you routinely avoid contact with all chemical products and that you wear suitable gloves (preferably elbow-length) when skin contact is likely.

**Protective Material Types:** We suggest that protective clothing be made from the following materials: rubber, PVC.

**Respirator:** Usually, no respirator is necessary when using this product. However, a P1 mask should be suitable if necessary.

# **Section 9 - Physical and Chemical Properties:**

Odour:No odour.Boiling Point:No specific data. Expected to decompose before boiling.Freezing/Melting Point:Active ingredient melts about 203-205°CVolatiles:No specific data. # Section 10 - Stability and Reactivity

**Reactivity**: This product is unlikely to react or decompose under normal storage conditions. However, if you have any doubts, contact the supplier for advice on shelf life properties.

**Conditions to Avoid:** Protect this product from light. Store in the closed original container in a dry, cool, well-ventilated area out of direct sunlight.

Incompatibilities: strong acids, strong bases, strong oxidising agents.

**Fire Decomposition:** Carbon dioxide, and if combustion is incomplete, carbon monoxide and smoke. Nitrogen and its compounds, and under some circumstances, oxides of nitrogen. Occasionally hydrogen cyanide gas. Oxides of sulfur (sulfur dioxide is a respiratory hazard) and other sulfur compounds. Most will have a foul odour. Water. Carbon

### MATERIAL SAFETY DATA SHEET

Issued by: Farmoz Pty Ltd Phone: (02)9431 7800
Poisons Information Centre: 13 1126 from anywhere in Australia, (0800 764 766 in New Zealand)

monoxide poisoning produces headache, weakness, nausea, dizziness, confusion, dimness of vision, disturbance of judgment, and unconsciousness followed by coma and death.

**Polymerisation:** This product will not undergo polymerisation reactions.

# **Section 11 - Toxicological Information**

**Toxicity:** Acute toxicity: Sulfometuron-methyl's acute oral toxicity is very low. The  $LD_{50}$  of Sulfometuron methyl in rats is greater than 5000 mg/kg. One study showed an  $LD_{50}$  greater than 17,000 mg/kg. The acute dermal toxicity of the compound is also low. The  $LD_{50}$  values for exposure through the skin ranges from over 2000 mg/kg in female rabbits to over 8000 mg/kg in male rabbits. The technical compound is not a skin irritant or a skin sensitizer. It has mild eye irritant properties in rabbits. The acute inhalation  $LC_{50}$  is above 5.3 mg/L in rats, indicating its slightly toxic nature by this route.

**Chronic toxicity:** Several toxic effects have been seen with chronic exposure to Sulfometuron-methyl in test animals. At doses of 25 mg/kg/day, dogs experienced reduced red-blood cell counts and increased liver weight. In this study, dogs were fed the compound in their food for a year. In two other studies conducted over 90 days, rats had increased white-blood cell counts (leukocytes) and anaemia only at the highest dose tested (375 mg/kg/day). In a 2-year feeding study, no effects were noted below 7.5 mg/kg/day in rats.

**Reproductive effects:** In a 90-day reproductive effects study in rats, no reproductive effects were observed at doses of 300 mg/kg/day. Another study in rats showed decreased fecundity and body weight at 300 mg/kg/day. Studies of rabbits showed no foetotoxic effects at 300 mg/kg/day, the highest dose tested. Reproductive effects due to Sulfometuron-methyl are not likely.

**Teratogenic effects:** No teratogenic effects were observed in studies of rats and rabbits at doses of 300 mg/kg/day. It is unlikely that Sulfometuron-methyl is teratogenic.

**Mutagenic effects:** The compound was not mutagenic in a variety of assays conducted on Salmonella cells and Chinese hamster ovary cells. It is unlikely that the compound poses a mutagenic risk.

Carcinogenic effects: No carcinogenic effects have been detected in either rats or mice exposed to Sulfometuronmethyl.

**Organ toxicity:** As was noted above, increased liver weight may result from chronic exposure. Damage to blood forming agents may also occur.

**Fate in humans and animals:** Sulfometuron-methyl is readily absorbed through the gastrointestinal tract and is rapidly broken down and removed from the organism. Half-lives of the compound in rats ranged from 28 to 40 hours, depending on the dose (16 mg/kg and 3000 mg/kg, respectively). The compound did not accumulate in rats.

# **Section 12 - Ecological Information**

This product is biodegradable. It will not accumulate in the soil or water or cause long term problems.

**Effects on birds:** Sulfometuron-methyl is practically nontoxic to birds. The acute oral  $LD_{50}$  in mallards is greater than 5000 mg/kg. An 8-day dietary study with mallard ducks and bobwhite quail also showed an  $LC_{50}$  greater than 5000 ppm for both species.

**Effects on aquatic organisms:** The compound is slightly toxic to freshwater fish. Its  $LC_{50}$  in rainbow trout and in bluegill sunfish is greater than 12.5 mg/L. While the compound may not present a significant threat to adult aquatic organisms, the embryo hatch stage of fathead minnow may be at particular risk from the presence of the compound. Fish kills have been associated with Sulfometuron-methyl, but other causes have not been ruled out. Sulfometuron-methyl is practically nontoxic to the water flea, Daphnia magna. Its  $LC_{50}$  in the water flea is greater than 125 mg/L for the technical material and greater than 1000 mg/L for dispersible granules. No bioaccumulation has been detected. Effects on other organisms: No data are currently available.

#### Environmental Fate:

**Breakdown in soil and groundwater:** Sulfometuron-methyl is of low to moderate persistence in the soil environment. It is broken down in soil by the action of microorganisms, by the chemical action of water (hydrolysis), and through the action of sunlight (photodegradation). Reported field half-lives of Sulfometuron-methyl range from 20 to 28 days. In several field dissipation studies, half of the initial applied amount of the compound remained for 1 to 3 weeks, depending on soil type, vegetation cover, and pH. Under anaerobic soil conditions, the compound persists slightly longer, though the half-life is still rather short (up to 8 weeks). Sulfometuron-methyl does not bind strongly to soil and is slightly soluble in water , but is rapidly degraded and does not appear to pose a threat to groundwater. Field study data indicated a majority of the parent compound stays within the top 3 inches of soil.

**Breakdown in water:** In well aerated acidic water, the compound is broken down quickly. Reported field half-lives for Sulfometuron-methyl in water vary from 1 to 3 days to 2 months or more. Photolysis is generally less important than hydrolysis in its breakdown. Under non-oxygenated (anaerobic) conditions in water sediments, the compound had a half-life of several months.

**Breakdown in vegetation:** Because Sulfometuron-methyl is toxic to a number of plants and is non-selective, the use of the compound on non-croplands, including rights of way and along ditch banks, may endanger both terrestrial and aquatic plant species.

### MATERIAL SAFETY DATA SHEET

# Section 13 - Disposal Considerations

Disposal: There are many pieces of legislation covering waste disposal and they differ in each state and territory, so each user must refer to laws operating in their area. In some areas, certain wastes must be tracked. The Hierarchy of Controls seems to be common - the user should investigate: Reduce, Reuse, and Recycle and only if all else fails should disposal be considered. Note that properties of a product may change in use, so that the following suggestions may not always be appropriate. The following may help you in properly addressing this matter for this product. Special help is available for the disposal of Agricultural Chemicals. The product label will give general advice regarding disposal of small quantities, and how to cleanse containers. However, for help with the collection of unwanted rural chemicals, contact ChemClear 1800 008 182 http://www.chemclear.com.au/ and for help with the disposal of empty drums, contact DrumMuster http://www.drummuster.com.au/ where you will find contact details for your area.

# Section 14 - Transport Information

ADG Code: This product is not classified as a Dangerous Good. No special transport conditions are necessary unless required by other regulations.

## Section 15 - Regulatory Information

**AICS:** All of the significant ingredients in this formulation are compliant with NICNAS regulations. The following ingredients: Sulfometuron methyl, are mentioned in the SUSDP.

## Section 16 - Other Information

This MSDS contains only safety-related information. For other data see product literature.

Acronyms:	
ADG Code AICS	Australian Code for the Transport of Dangerous Goods by Road and Rail, 7th Edition Australian Inventory of Chemical Substances
CAS number	Chemical Abstracts Service Registry Number
